

## Children's School Improvement Plan 2021-22

For the period:

September 2021 - July 2022

**Here are some things we are going to do to help you this year.**

<b>What you told us</b>	<b>What will we do together?</b>
We want to continue to learn about lots of different subjects.	Your adults will spend time looking at all of your learning and how we can make it even more interesting such as adding in special days and weeks. We would like your ideas in class, when you meet with Mrs Castell and through your school council.
We want you to have the best phonics lessons we can give you and that you all are taught in the same way.	We will give you new reading books and help your adults to plan your phonics lessons. We want your library to be even better.
We want to bring back more of the events that we have not been able to do.	We want your parents to come to more things in school including reading with you and seeing your assemblies and events.
We understand that some things in school will be new to you, or you have not taken part in them for a while.	We will help you with routines such as eating in the hall and attending assemblies together and playing together in the playground.
We would like to do even more to look after your well-being including the adults who care for you in school.	We will have more special days and events for well-being and plan for our new building so we have more room for you to take part in well-being. We will choose some fun things for your adults to do together when you are at home.
